How To View Code:

- Go To Our Repository On <https://github.com/theamazing0/global-subtitles-main>

How To Run Code:

- Install Python 3.10.1 from <https://www.python.org/> for windows and macos or from you distro's package manager on linux
- Afterward install the requirements for the package by running (In the project directory):

```
pip install -r requirements.txt
```

Varying on setups you may have to specify pip3 or pip3.10

- Run (In the project directory)

```
python app/app.py
```

Varying on setups you may have to specify python3 or python3.10

- The Application Should Now Be Launched To Your System Tray
